Where the elegance of the west is at your fingertips.

*Specializing In: Deer Skin Window Treatments, Leather Bedding,
Pillows and much, much more!*

Introduction

DISCLAIMER:

It is important to all who order our products, be it window treatments, bedding, pillows, or whatever the case may be, that most everything we make is deer skin and there is no such thing as a deer skin without holes and/or other imperfections. We buy nothing but #1 skins, but even so, there are natural markings and holes. The holes are usually where they get shot and the scratches are from insects and rubbing in the wild. We patch every visible hole unless otherwise specified. To most people, these markings enhance the beauty of each piece. However, some people don't agree. And for those people, please know ahead of time that Indian Creek will not accept any returns on custom orders because of color variance or imperfections in the hides.

INDIAN CREEK LEATHER STUDIOS is a custom design work room specializing in leather window treatments and accessories. We have both retail and wholesale pricing. Indian Creek was a Custom Design Workroom long before we made leather window treatments.

In the 80's, we opened as a normal workroom, dealing in decorator fabrics and trims and we continue to work with fabrics to this day, we have simply applied our knowledge of windows and accessories and substituted leather for fabric. It is because of this knowledge and years of experience that we are able to turn out custom window treatments in every style and function. Every window treatment, comforter, bed skirt, ect is created with your measurements and is hand made by professionals that have worked in the interiors industry for 20 years or more.

We are a member of the Window Coverings Association of America, which works very closely with the American Society of Interior Designers and we guarantee each and every item that you purchase from Indian Creek to be made following the guidelines of a certified workroom. A very large percentage of our work is done for designers across the United States. We come highly recommended and will gladly supply references if needed.

Indian Creek is the creator of the leather swag, the prairie swag, the leather roman and mock roman, not to mention many one of a kind custom designs done for people just like you and we will continue to create new and beautiful window treatments as long as you the customer continue to purchase them!

Indian Creek is located in a loft just one block West of the downtown light in Shamrock Texas. We have a 5000 square foot workroom / showroom displaying many different window treatments, bedding, pillows, and more. If you are ever in the area, please stop by and see us.

You can also visit us in Dallas Texas at the World Trade Center on the 9th floor in the Hemisphere Accent Gallery.

Deer Skin bedding

Leather bedding has to be the most unique look in Western bedroom décor. In our price list you will find a list of things you can add to any item, and any of these would work here as well. There are simply infinite ways you could design your bedding. Pictured here we have used tobacco and saddle together with buck stitching, shams and pillows to match. Bedspreads and bed skirts are also available. The bed skirts can be pleated and inside the pleats may be normal or a contrasting color. Concho's, fringe, tassles, ect. Use your imagination or let us use ours!

The Leather Arch

Get the effects of an architectural change without hiring a builder. This leather arch was placed over a square window, softening and adding curve to a very "line" dominated kitchen. Once again, there are many ways to design your arch. These treatments require a template and exact measurements. They come mounted to an arched board created from your template and the projection is approximately 3" unless otherwise specified. Call us with your ideas or ask for ours!

Leather Panels on Rings

What an extraordinary way to decorate your window! These panels can fit any size window, be short or reach the floor. They are functional as well as beautiful. They are available with the Native American Beadwork and can be lined or unlined. The finished width is figured at 1.5 x the width of your window. The pricing is figured by the square foot.

Leather Swag and Jabot Board Mount

The difference between this swag and the rod mounted swag is there is no "Top Drop" and the swag comes mounted on a board which comes attached with angle brackets that screw directly into the wall. This particular treatment can be done as an inside or outside mount. It uses the same amount of hides as the rod mounted swag. You can dress the swags up or have them plain. For instance, the crème colored swag pictured here is 36" wide and has been dressed with twisted fringe jabots and 36" twisted fringe tassels. The swag also has the nail heads and twisted fringe. This treatment sells for \$919, the same size treatment with no dressing is \$500. (Prices vary upon size- however the price would not change much up to a 60" width, over that would require two or more swags and the price for each is \$250.00)

The Leather Swag & Jabots Rod Mount

Our most popular window treatment. The swag is an elegant addition to your western decoration. It is versatile in size, easy to install, and reasonable in price.

Each swag covers up to 60" and consists of two deer hides. The top drop can be as small as 6" up to just about whatever you wish. The bottom drop can be from 16" up to around 32". The larger the top drop is the longer the bottom will be. The jabots will average up to 48" in length with 1 hide and 80" with 2 hides and so on. All finished measurements will vary slightly due to the difference in each individual hide. There is a measuring chart on page 7 of the price list for your convenience.

The Roman Shade

priced by the square foot

The roman Shade is a very popular window treatment that combines function with beauty. This particular style can be done as an inside mount or outside mount. As a true roman shade, it comes mounted on a board with angle brackets for easy installation. It rolls up and down with the pull of a cord. The roman shade can be ordered with a liner or without. It can also be used as a valance itself, or a mock roman, which will not roll up and down. (as a valance, you will need to add 8" per permanent pleat, to your finished length) The true roman shade can be ordered with a valance added to it as well. Please refer to price list for measuring and pricing.

★

Valance with Twisted Fringe & Roller Shades

Twisted fringe, another wonderful way to achieve that western style you've been looking for. This twisted fringe can be applied to pillows, roman shades, lamp shades, dust ruffles, ect. It can also be a variety of lengths. Here, we have it on a valance accenting and hiding the hardware on the roller shade beneath. The roller shade protects the valance from sun damage, making it functional as well as beautiful. Our shades are made with a textured fabric laminated to a commercial roller for continuous durability. The fabrics we use are available in swatches upon request or customers own materials are welcome. The shades work well to protect all of our window treatments since leather fades when exposed to direct sunlight.

The Cascade with Tabs

The cascade done in leather with tabs gives a new look to a very popular style. It can be done with tabs or rings. The concho's pictured left can be substituted for beaded rosettes, sterling concho's, or omitted completely. Fringe is also a possibility.

Rod Mounted Valance

This type of valance can hang on the rod with rings or tabs. It can have straight fringe, twisted fringe, or no fringe at all. These are figured by the square foot and tabs and rings are separate. You can order rods from us.

Prarie Swags

The Prairie swag also needs special measures and a chart is provided to help you with this. The prairie swag can only be on a rod but you do have the choice of rings or tabs. It has side panels that can be any length you'd like, and then you divide the window width to decide how many scoops you have in between tabs or rings. The amount of tabs and rings will always be an odd number. 3 is the smallest, 5 is next and so on. These are measured by the square foot.

Pillows

above: Flap Pillows

right: Western Yokes

The Sky's the Limit, when it comes to pillows, here at ICI. We can create for you any size, trim, applique, beadwork or concho's; Also pictured above are three different yoke styles to add the perfect finishing touches to your pillows. If you will send us a picture of your brand, we'll do it. With most things we do, you create the design and we will try to turn it out.
